

Java

```
class Solution {  
    public String[] findRelativeRanks(int[] score) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} score  
 * @return {string[]}  
 */  
var findRelativeRanks = function(score) {  
  
};
```

C++

```
class Solution {  
public:  
    vector<string> findRelativeRanks(vector<int>& score) {  
  
    }  
};
```
